SWOOD by EFICAD: **A Comprehensive Software Solution for Wood Manufacturing Industry**

Introduction:

SWOOD is a comprehensive software solution tailored for the woodworking and carpentry industries. It combines design, production, and management capabilities into a unified platform, enabling users to handle complex projects with ease. By leveraging its integration with SOLIDWORKS, SWOOD allows users to create detailed 3D models and generate precise manufacturing documentation.

Benefits:

SWOOD is a Parametric design specific for woodworking, such as customizable panel dimensions, joints, and hardware placements. SWOOD generates accurate cut lists and material specifications, aiding in precise planning and reducing material wastage. The SWOOD provides the comprehensive documentation, including assembly instructions and machining details which helps streamline the production process. SWOOD includes features for validating designs against manufacturing constraints, helping to catch potential issues early. Automated features and streamlined workflows contribute to faster project turnaround times.

Highlights:

- Seamless integration with SOLIDWORKS
- Enhanced Design Capabilities
- Custom Templates
- Hardware library
- Material & edge libraries
- Accurate cut lists
- Easy Documentation
- Real-time Updates
- Efficient Workflow
